

AIMS AND OBJECTIVES

- The Department aims to provide a broad multidisciplinary course in Zoology.
- To train students in a wide range of science-based skills that provide the learning base for future careers in disciplines such as health sciences, agriculture, environmental management, teaching, and research.
- To promote training in practical and conceptual skills in sub-disciplines ranging from molecular cell biology, through physiology and Endocrinology, to the study of populations in both an ecological and evolutionary framework.
- To provide constructive feedback on their progress, individual students will be assessed throughout the year in their project work, participation in seminars and written work for supervisions.
- To promote students for self-employment through aquaculture, sericulture, apiculture, bio-fertilizer and Vermi-culture.
- To produce globally competitive graduates and postgraduates in Zoology
